The structure of school education has been overhauled with the addition of pre-schooling provision for kids. The policy also aims at increasing the higher education GER to 50% by 2035. The NEP 2020 intends to boost the spending on education by enhancing the education budget to a level of 6% of the GDP. As per the policy document, the Centre and the States will work together to increase the public investment in the Education sector to reach the targeted budget of 6% of GDP at the earliest. The NEP 2020 also brings flexibility for students to choose subjects in place of streams for their higher education. This aims at strengthening the cross-functional study environment and developing critical thinking amongst students. Also, multiple entry and exit options will be there for students in the form of certificate, diploma and degree during their higher education.
